Machinery Technology

PART 01

安装环境准备

Installation Environment Preparation

配件及附件核对 Accessories and attachments check

核对配件数量

Check the number of accessories

确保所有配件数量与清单一致

Make sure all parts quantities
match the list

检查配件完整性

Check the integrity of the accessories

inspect if the accessories are
complete and not damaged.

场地清理与整理 (Site cleaning and tidying up)

- **清理杂物 Site cleaning and tidying up**

清除场地内无关杂物，确保安装区域整洁。

Clear irrelevant debris from the site to ensure the installation area is clean

- **整理设备 Arrange the various machine parts**

将所需设备按序摆放，方便安装时取用。

Arrange the required equipment in order for easy access during installation

确保电源可用及线路检查

Ensure power supply is available and check the circuit

01

电源稳定性 Power stability

确保电源稳定，避免电压波动影响机器运行

Ensure stable power supply to avoid voltage fluctuations affecting machine operation

02

线路安全性 Electrical wiring safety

检查线路是否安全，避免漏电或短路风险

Check whether the circuit is safe to avoid leakage or short circuit risks

03

备用电源准备 Backup power supply preparation

准备备用电源，确保在停电情况下机器能正常运行

Prepare backup power to ensure the normal operation of the machine in case of power outage

PART 02

安装调试所需准备的硬性条件

Items required before installing
and debugging the machine

开机前需准备的物料和设备 (Materials and equipment to be prepared before starting the machine)

1.

减速箱齿轮油 Gear oil for reduction gearbox

Global unified model: CKC 220

2.

气泵 air pump

Air compressor required for works ---

You can buy it locally or ask us to buy it for you and load it into the container if there is extra space.

3.

原料 Raw Materials

Prepare the corresponding PE or biodegradable raw materials according to the film you need to produce

4.

纸筒 Paper tube

Paper tube for winding

有印刷机设备的 客户准备油墨

Customers with printing
press equipment need to
prepare ink

Thanks
Our mission :help our customers
to **successful**
